

## JUNE NEWSLETTER

We are pleased to announce the opening of our new tea room and gift shop to provide more inside seating, so that we can serve more of our famous cream teas and lunches. This was a result of feed-back from customers who said they would visit more often during inclement weather, if we had a bigger tea room and dining area. We have also moved the gift shop, so it is now brighter and has

more pocket-money toys for children – as well as hand-made gifts and crafts.

**Thank you for all your comments, please tell us or write to us, to let us know what you think of our products and service, so that we can continue to provide you with the service you deserve.**

If the temperatures are good the bees will be making lots of honey for this years harvest. At the moment we are checking the bees weekly to ensure they don't run out of room inside the hive, as this causes them to swarm, which means we end up with less honey and fewer bees. To remedy this, a good beekeeper will add more levels to the hive – known as supers – which the bees can then fill with honey. We also need to monitor the bees to make sure they are in tip-top health, and be ready to take action if any of the colonies look poorly. Looking after bees is the same as caring for any other livestock and this time of year is the busiest for all good beekeepers. If you have space in your garden for a beehive and time to carry out weekly inspections, please visit [www.bbka.org](http://www.bbka.org) if you would like to learn how to keep bees. It is a fascinating and rewarding hobby, and the bees in this country need more beekeepers to look after them.
